To Whom It May Concern,
I was unable to attend the public hearing on the Draft Generic Environmental Impact Statement due to a back injury & my husband was on a business trip.

We have lived and raised our family in Yonkers since 1979 and have always lived in peace with everyone. We know there was a Hasidic community and everyone went about their business and still do. We moved from Queens, where we resented the urbanization, traffic congestion, pollution etc. As many of our neighbors we moved here for the rural flavor.

Our main objection to the annexation is the urbanization it will bring. Buildings upon buildings, loss of scenic beauty and wildlife. I understand sewage from their poultry plant is affecting our waters and the disregard of our building codes, zoning and any other laws that affect their community is ignored by their government.

Believe me, it is not about their religion, dress or anything of that nature. We would feel the same about any group who behaved in that fashion. I am disgusted with the already overdevelopment that has occurred in our area over the past 30 yrs. I am also against casino's. My disgust over the past thirty years is with greedy developers who don't

like to see an inch of land go undeveloped.

My argument is not with the Hasidic people. We have nothing against their lifestyle except we cannot accept the total ruination of where we live by the urbanization being brought to us by them or anyone else.

Thank you so much for your time on this matter!

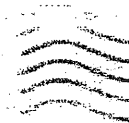

Sincerely

Doreen & Louis Falot
